By FLORENCE E. BROOKS.

Copyrighted, 190.. by E. C. Parcells.

For some time Algernon Dinwiddie had been an enthusiastic member of the Gentlemen's Automobile club; therefore his friends were not at all surprised with the announcement that he intended taking his wedding trip in one of these machines. He and his bride were to spend three weeks in this way, going where fancy dictated.

The quiet morning wedding was held at the country home of the bride, and. with the exception of the two families and officiating clergymen, no one was present except Ronald Smith, the groom's chum and almost brother, who was equally addicted to the auto. though not so expert in its management.

The wedding service was over, and the moment had arrived for the departure of the bridal couple. Every one was out on the driveway to bid them godspeed. The baggage having been sent on ahead, the bride was helped to her seat, and her newly made husband was about to take his his hand into his pocket a blank look overspread his face.

"Well," he exclaimed, "I came uncomfortably near forgetting my pock etbook.'

With this he ran into the house, entering the room where he remembered having placed it while he dressed. It was not there, and while he continued the search his bride became restive and began examining the various parts of the auto, when suddenly it started from one cheek to the other and said to move.

Ronald Smith sprang up beside her and frantically attempted to stop the machine. Working with it a moment. he was horrified to see it shoot off at feller hez been cavoortin round the full speed.

The little bride screamed and wildly clutched the back of her seat.

"Strange I can't stop this thing." ejaculated Smith. "There seems to be something about it new to me."

His repeated efforts were of no avail, and they were now out of sight of the house and going as fast as ever.

"Oh, Mr. Smith, can't you stop it?" wailed the poor bride. "The most I can do is to keep it in

the middle of the road, Mrs Dinwid-"What will Algernon think

"That you've gone with ano let though not a handsomer man!" he said with a laugh. "I don't think that was a bit nice

of you," she pouted. "I beg your pardon, Mrs. Dinwid-

die. At the new title she blushed prettily

then said "But if you can't stop this horrible

machine we shall be killed."

"Oh, no. But sit perfectly still and hold on tightly. There is one comfort; it can't go on forever, like the brook, you know," said Smith consolingly.

They were tearing along like mad. The fence rails at the roadside appeared almost continuous and the trees a confused mass. Smith's hat had blown off. He did not dare to look to the right or to the left, but concentrated all his energies to the task of keeping to the road.

The farmers in the fields which they passed gazed after them with open mouthed amazement. Just then Smith discovered a coming

"Turn out! Turn out, for God's sake!" he roared.

Thus admonished, the driver of the wagon quickly did as requested. It was a close shave, and the trembling bride drew a long breath of relief when they had safely passed. Then she remembered a long, steep hill ahead.

"We can never go down that hill at this rate of speed," she exclaimed excitedly. "Turn off, Mr. Smith; turn off quickly! Down that road to the left!" pointing.

"Where does it go?"

"Oh, I'm sure I don't know, but anywhere is better than that hill."

Smith, who now felt as if his hair were standing on end, carefully guided the machine into the left hand road. The speed was so great and the turn so sharp they came within an ace of going over. The road they had entered was very narrow indeed, little more than a lane; also it was very rough. The auto went bumpty bump till it seemed every moment would be Suddenly they both saw the lane

end in a large field. Smith shut his lips together firmly when he thought what would have happened had the gate into the field been closed, but he only said:

"We'll run in here and go round in a circle till this infernal thing runs down. Oh. I beg your pardon, Mrs. Dinwiddie!"

"Don't mention it," said she quite calmly/

The field was rather rough, and they both were too intent-he upon trying to guide the auto and she upon keeping her balance—to indulge in extended conversation. However, by the time they had made the circle of the field a dozen times the bride cried:

"Oh, I am getting dizzy!" "Shut your eyes, but hold on tight-

ly." Smith answered.

"Hi there! What 're you idjits spilin' my clover fer? Stop, I say!" commanded an old farmer from the fence.

The bride was so startled she near ly fell from her seat. "Haven't time to stop today," roar-

ed Smith without turning his head." And be again shot around the circle. "Ye'll pry fer thet clover, all right,

my man!" shouted the farmer next time they came up to him. Their he sat on the fence and had some encouraging word for them each

time they came round. "This is becoming decidedly monotenous," remarked Smith.

"I find it highly exciting," disagreed the bride. "That old duffer is adding insult at

injury," growled Smith. "I wonder does he think we are circling round this field for pleasure or for the good

"I'm devoutly thankful none of our friends can see the edifying spectacle, answered the bride. "But do you thisk it will ever run down?" meaning the

"It's slowing down a little alread Mrs. Dinwiddie. Be patient."

When at last Algernon Dinwiddle found his pocketbook and came down stairs he was stricken dumb for an B stant upon hearing of the strange d appearance of his bride. Then gasped out: "Of course they can't stop. Which

way did they go?" Then he dashed down the road. He was a good sprinter and thought if his fears should proge correct he would probably come upar the remains of the auto, very soon, he had little faith in the ability Ronald Smith to guide it. As he tore along the road, following

thé track of the machine, he was se place beside her when upon putting prised to see it had turned into such a narrow lane. And when he was about ready to drop from fatigue he saw the field and the auto still ambling rou in its circle:

"Thank heaven, she's safe!" Di widdle gusped out. Whether he r ferred to his wife or the auto I leage you to guess:

The old farmer was still perche upon the fence and upon seeing Di widdle shifted his quid of tobace

"Ef you're lookin' fer them tarn fools, ye'd better set down longsid o' me en' wait. I've been here more a half hour-seems like-en' thet craz here field the hull enduring time, for all the world like a colt jest turnel out to pasture."

At that moment the bride caugh sight of her husband and rising to he feet in the auto stretched out her arm

"Oh, Algernon," she called, "he me! Stop it!

"Sit down and hold on, Maud!" con manded Dinwiddie. "It'll stop soo now. Going over such rough ground uses up the power sooner."

"I'm lavin' fer that feller," volum teered the farmer. "Ef them city folk thinks they kin come it over Josia Hunter, I'll jest show 'em a thing e

When the automobile came roun again Dinwiddie called out: "Stick to her, Smith, old boy, she"

most played out'

"Oh, yes, I'll stick to her all right was Smith's ironical answer. "I fus dote on this job."

"It, won't go round more than one or twice more," said Dinwiddie, turn ing to the farmer. And, in fact, the machine stopped before accomplishing that much, stopping at the foot of : little rising ground. Immediately Din widdle and the farmer rushed over

When the former assisted the bride to the ground she almost collapsed in his arms.

"Oh, Algernon," she implored, "don' ask me to continue the trip in that horrid thing. I have had the most frightful experience I ever had in my life."

Then Smith explained how it all happened.

"Of course you couldn't stop it, Dinwiddie informed him. 'I just had an invention of my own for regulating the speed put on it. It's a good thing. but of course you've got to know how

"I should think so," remarked Smith sotto voce

"Who's ter pay fer thet clover thet's sp'iled?" put in the farmer, who had been walking round the auto, examining it with great disgust.

"I'll fix that all right, old fellow," promised Dinwiddie.

"Oh, Algernon, how you do look!" laughed the bride.

"It appears to me we are three of a

kind." he answered. And indeed they were an interesting

trio. Dinwiddie's light trousers were mud bespattered with running through countless puddles. His neck scarf was under one ear, and his collar wilted to but a semblance of its former stiffness. Smith was minus his hat, while that of the bride was on one side of her head. Her hair also was far from be ing in the perfect order she wore it when starting.

"Well, I'm thankful you got off se easily," remarked Dinwiddie, "and I guess we'll have to telegraph the club for a man to come and take charge of the machine. And, Smith, if you'll attend to it for me Mrs. Dinwiddle and I will resume our journey by rail."

They did so getting the farmer to take them to the railway station.

A Bald Venus.

The ancient Romans at one time knew a Venus the Bald. The goddess was worshiped by that name in a particular temple after the invasion of the Gauls, the reason assigned for this desired and strimmed on the outside strange fact in antiquity having been with gray so tache braid, while a few that the brave women of Rome cut the city's defense.-London Chronicle.

WOMAN AND FASHION

Dyed Net and Cloth.

As the ceason advances many novelties are shown in smart and beautiful designs, and one that is attractive is the use of braids and passementeries on a groundwork of coarse net, which greatly resembles the background on which our mothers worked mottoes in crewels. The effect is quite rich, especially when combined with velvet, cloth or toile A design is shown today which gives an idea how these

heavy nets and laces may be used in a new as well as a practical way. combination of stitched cloth straps on the net is decidedly novel, and the use of tiny rulles of lace for the upper sleeve portion helps to carry out the effect. The skirt is comparatively plain except for the bands of cloth stitched to the net foundation. The cloth and get may be in slightly contrasting shades or the net may be dyed to make the color of the cloth or

Exthavagance In Furs. Furs are having a wonderful popu larity this season. Women have been educated up to them, and the woman who had only one set last season will want two of three sets this year, and maybe, if she be of the luxurious type she will go in for half a dozen. One could easily do this without being overdressed or extravagant. A certain soul wanian made a scarf built of big satin, and its shape i oad, with rounded ands It is heavil fined with white atin and it is braided from one end to the other with wery tiny blue cord, out row band of chinchilla fur. And there is a big chilla muff to wear with it. A toque of the same completes the lovely set. The chinchilla is also ex cellent with gray.,

Smart Sack Coat.

This little roat of ash gray cloth, designed to be worn with a white cloth empire gown, has an unusual vest effect. Two wide pointed tabs of apricot velvet are lapped and clasped with a

single large topaz. The same dark velvet is used in collar and cuffs and forms the centers of "daisy" buttons of lace. The pat is of black satin, with his friend asked him how he rememlarge choux and shaded aigrets.

Fancy Coat.

Gray cloth an be made into a beautiful coat or sape coat by using a mandarin coat pattern for the purpose If designed for evening wear, a coat of this description can be lined throughout with pale shell pink silk, quilted if coral ornaments can be sewed among puncher and putting in a winter as a off their hair to make bowstrings for the applique patterns to harmonize with the pink lining. The sleeves being wide, the lining should be of pink furs to Chicago. Then he went back silk, with the edges bound with gray to Wyoming and settled on government satin to match the coat. Large silver land under the homestead act. Now be additional trimming. A gray coat where he has 30,000 sheep, thousands think, so I offered to lend uncle my of this description was made collariess of horned cattle and several hundred and finished with a chinchilla boa.

STOPPED THE YELPING.

Rostand's Peasant Who Had Great Power Over Animals.

"When Edmond Ros and had combleted his beautiful villa at Bayonne, he was on the verge of a nervous breakdown because of his inability to sleep," says a Paris paper. "The restfulness of the place, however, and the charming surroundings worked wonders, and after a few days had passed the weary writer was able to sleep. and his friends looked for his speedy return to good health. But a dog blocked the progress of the cure. One night the dog began to bark, and in a short time dogs in all directions answered, and the concert kept up until day broke. All efforts to locate the mischief making animal failed. Every night at the same time the barking began, and no one could suggest a remedy. One day one of the servants told about a ne'er-do-well in a nearby village who had great power over dumb The cat heeds not as she hurries by. animals-possibly he might help. He was called, a large reward was promised, and the barking ceased. A few weeks after the reward had been colweeks after the reward had been col-lected Rostand was again disturbed Thou ***** of evil spells that betray, by the dogs under the leadership of the same unknown barker. The peasant was again called, and Rostand said, You must be well acquainted with the ways of animals to have such power over them.' The man beamed under the influence of the diplomatic flattery and proudly showed how he could imitate the whistling of birds and the noises made by animals in woods, barn or poultry yard. 'And how about dogs? said Rostand. Then the man began to bark, and immediately the voice of the arch disturber was recognized. 'That's enough,' said Rostand. Here is a twenty franc piece. If we should hear the dogs bark again, the police will be called.' The peasant saw that he had fallen into a trap, the dogs were heard no more, 'and that.' says the writer, 'is my dog story without a dog."

EASY HOSPITALITY.

Food Abundance In Virginia In the Seventeenth Century.

Few countries of the world have possessed so abundant and varied a supply of food as Virginia during the seventeenth century. This partly explains, writes P. A. Bruce in "Social Life In Virginia In the Seventeenth Century," the hospitable disposition of the people even in those early times. The herds of cattle, which ran almost wild, afforded an inexhaustible supply of milk, butter, cheese, veal and beef. Deer were shot in such numbers that people cared little for venison. So abundant were chickens that they were not included in the inventories of personal estates. No planter was so badly off that he could not have a fowl on his table at dinner!

Vast flocks of wild ducks and goese frequented the rivers and bays and were looked on as the least expensive portion of the food which the Virginians had to procure. Fish of the most delicate and nourishing varieties were caught with hook or net. Oysters and shellfish could be scraped up by the bushel from the bottom of the nearest inlet or tidal stream.

Apples, peaches, plums and figs grew in abundance. Not only were grapes cultivated, but excellent varieties grew wild through the forest. Such an abundance of wild strawberries could be gathered that no attempt was made to raise the domestic berry.

The watermelon flourished, and in hominy, the roasting ear and corn pone the Virginians possessed articles of food of great excellence, which were entirely unknown to the people of the old world. There was produced on every plantation an extraordinary poplar. quantity of walnuts, chestnuts, hazelnuts and hickory nuts. Honey was obtainable in abundance, both from domestic hives and from hollow trees in the forest.

Bad Night For the Show.

Piloting an unknown show through a starving territory is no cinch, but I have thought out a good idea. In anticipation of each engagement I am going to call out the reserves and when they are out they will be invited in. That will help fill the house.

You have heard of the various excuses for light business- because the night is so dark," etc. This is a hot

"Young man," said the local manager to the agent on his first tour, "why do you bring your troupe here on a Saturday night? Don't you know you won't do any trade?"

"What's the difference between Saturday night and any other night?" asked the agent.

"Because everybody's getting shaved."-New York World.

Too Easy.

The Union bank of St. Petersburg has its own police service. One night the director was seepless. He wondered whether the bank police were really trustworthy. He concluded to make a trial. He disguised himself and rushed, pistol in hand, into the bank vault. The police were good for nothing. They looked on quietly. while the director pocketed 2,000,000 rubles and carried them away. Since then no one has seen the director .-Simplicissimus.

His Rush.

Boy (reading) -She threw herself into the river. Her husband, horror stricken, rushed to the bank- Teacher (cutting in)-Why did the husband rush to the bank? Boy-Please, sir, to get the insurance money. - London Mail.

A STRANGE SENTENCE.

Punishment For Murder That Was More Cruel Than Death.

In 1801 a man died in the Catskills, who had been condemned by one of the strangest sentences on record. Ralph Sutherland was born in 1701 and lived in a stone house near Leeds. He was a man of violent temper and morose disposition, shumed by his neighbors and generally disliked. Not being able to get an American servant. he imported a Scotchwoman, and, according to the usages of the times, virtually held her in bondage until her passage money had been refunded.

Unable to endure any longer the raging temper of her master, the girl ran away. Immediately upon discovering her absence the man set off in an angry chase upon his horse and soon overtook her. The poor woman never reached the house alive, and Sutherland was indicted and arrested on the charge of murder. At the trial he tried to prove that

his horse had taken fright, run away. pitched him out of the saddle and between two fingers, holds the bowl dashed the girl to death upon the rocks, but the jury did not accept the defense, and Sutherland was sentenced to die upon the scaffold.

Then came the plea of the insufficiency of circumstantial evidence and the efforts of influential relatives. These so worked upon the court that the judge delayed the sentence of death until the prisoner should be ninety-nine years old.

It was ordered that the culprit should be released on his own recognizance and that, pending the final execution of his sentence, he should keep a hangman's noose about his neck and show himself before the judges of Catskill once a year to prove that he wore his badge of inflamy and kept his crime, in mind. It was a more a glass out of very hot water and set cruel decision than the sentence of immediate death would have been, but it was no doubt in harmony with the spirit of the times.

Thus Ralph Sutherland lived. He always lived alone. He seldom spoke. His rough, imperious manner had gone. Years followed years. At each session of the court the broken man York Post, came before the bar of justice and silently showed the noose that circled his neck.

At last his ninety-ninth year came, the time when the court had ordered that the utmost penalty of the law should be executed. For the last time the man tottered before the judge's bench, but new judges had arisen in the land, new laws had been made, old crimes had been forgotten or forgiven. and there was none who would accuse him or execute sentence. Indeed, the awful restriction that had bound his life so intimately to the expiation of his crime was now legally removed.

But the spirit of self punishment continued, and when Sutherland, after he had passed his hundredth year, was discovered dead, alone in his house, his throat was found to be encircled by the rope which had been placed there nearly three-quarters of a century be-

A Vacation.

A certain scientist in the service of Uncle Sam at Washington is said to be a hard taskmaster to both his official and his domestic servants.

Being detailed once to accompany a scientific expedition on an extended cruise, the scientist is said to have unbent a trifle in communicating the. news to his personal attendant.

"Henry," said he, "how would you like to go with me around the world?" "Do we go from east to west, sir?" asked the man.

"Yes. "And we lose a day going that way, do we not, sir?"

"We do:" "Then, sir. I should like very much to go. It would give me a day off."-Harper's Weekly.

One Gift She Missed.

Six-year-old Harry wanted to buy his sister a little birthday present. His heart throbbed with joy at the thought, though he had in his pocket only 10 cents. Nevertheless a week ahead of time he went around the shops and came back with a very satisfied look. His mother asked him what he had bought.

"I got her a cream puff," he said. "Well, you know, Harry." said his mother, "that won't keep fresh for a week."

"That's what I thought after I bought it, mother," replied Harry calmly, "and so I ate it."-Ladies' Home Journal.

How Fast He Could Go. A breeder and trainer of race horses

who is known almost as well in England as he is here recently sold a horse to an Englishman. The Englishman before paying for the horse quibbled a bit about the price and then

"You know, I'd like to see the horse first just to see how fast he can go." "Never mind about that," said the trainer. "He can't go any faster than I can tell it."-New York Sun.

Family Secret.

"That's papa's picture," explained the little girl to the caller who was looking at a framed photograph on the piano. "You wouldn't know it unless I told you 'cause it's got a smile on the face."-Chicago Tribune.

DRYING THIN GLASSES.

A Dealer Tells Why the Maid Breaks

Them So Often. Our maid certainly worked destructi in ou those sherry glasses, those delle te little glasses," said the customer the dealer. There were six and she broke three inside of three months."

Oh, you got off easy, judging from the stories that come to us," replied the store man.

Well, I see how it is." responded the customer. Il tried wiping a few of these glasses myself the other night, and the first thing I knew I wiped the side right out of one. As the makes say, Why they break right in the

Now, if you would wait until they were nearly dry? remarked the dealer. "you'd never break any at all. Take this cordial glass with the very thin stem. You naturally seize it by the foot and turn it while you wipe the bowl with the other hand. While the glass is wet the dish towel, gripped like a vise, and you just naturally twist the stem in two. But if you let the glass get nearly dry the towel slips, and the danger is over." 'Doesn't that make streaked glass-

'No, not if the water and towels are clean. Of course you ought to have towels that you use only for glassware. Towels that have been used on dishes are likely to have grease on them, and grease is the great enemy

of brilliancy, in glassware." Then can soap be used in the wa-

Oh, yes. We use pure white soup with ours. The main point is to have the water hot enough. That helps with the drying; too, because when you take it aside to drain it will dry itself be fore you can take a towel to it. Tissue paper is good as a polisher because usually it has never touched grease. Alcohol has a reputation as a polisher, but its function is rather to clean. Cut up potatoes are good to shine up the insides of pitchers and carafes."-New

A FAREWELL CHAT.

Interview Between the Boss and the Man He Fired

Neither of the partners had arrived, and the clerks that morning were indulging in their usual bout of gossip. Did I tell you, chaps, that I was leaving?" drawled the languid swell of the staff, whose incompetence was

as palpable as the splender of his at-

"Heard you'd got the sack," replied the spectacled cashier gruffly

I answere had advertisement yes tenday for what looks like a first class job," resumed the overdressed one, ignoring the remark: "I've pitched ratha strong varia but you've got to do if you want to keep up with the

Just then the senior partner entered

and all wrote infently. Within five minutes the "old man!" who had been opening lefters, called the last speaker into his room, and the following dialogue became plainly audible to those outside:

"Have you been in our service seven "No, sir; only tifteen months."

"And is your salary £4 10s. a week? "Eh, no, sir; 30 shillings." "And are you in entire charge of the counting house?"

No reply. "And are you leaving us because of a difference with the firm regarding the management of our colonial

branches?" Dend silence and a short pause.

Then the old man: "You should be more careful in your statements, sir. This is a small world. The advertisement you answered was for the situation you are leaving op Saturday. That will do."-London Tit

Americanism In England.

The following speech is put into the mouth of an American belress in an English story called "A Subaltern of

Horse:" "I've a hunch that this is the biggest game of spoof I've officiated in yet. Mr. Herries. You have a nerve and no mistake. Then as Herries withdrew she caught sight of Fox's smiling face. The Bud turned on him hotly "You were in this too. I like your neck. You'll have to pitch a tale to pop. He's drawn on a man for less out west. Come, Margi, let's get we're the lobsters this hike. Captain. will you please escort us to our car

Mind Your Business!

It would be interesting to know how great a factor in the success of life is minding one's business. There are many men who have had a generous measure of success in their business, then they think the time has arrived when they can allow themselves the indulgence of some fad or fancy; but how often it is their undoing,

There are those who have succeeded in already giving good results. their business or profession, but finding it a trifle slow for their tastes, are temptbusiness," but are dipping into something will be on "Great Autobiographies" asilthey know absolutely nothing about and lustrative by types and problems of manas business. You can't get shead of the subjects will be found in an advertisering is a close corporation who see to it tickets opens this Saturday, at Trement Tremont Temple. On Friday evenings at 8.15 and Saturday afternoons at 2.30, that the too sanguine aspirant who is goown business, we have been watching the al Life." results of the game of chance and have come to the above conclusions.

The Test of Equality.

William Lloyd Garrison, of Lexington, had a long article in the Transcript, on Monday evening, in which he repudiated the misrepresentation of a certain newspaper in Boston, published in the interests of the colored people of this section. and whose editor is a bitter and unjust E. Nelson Blake for president; James critic of Booker T. Washington, of Tuskagee. It is claimed by Mr. Garrison that the paper misconstrued what he has said to uphold the editor's attitude toward Mr. Washington. In Mr. Garrison's article he gives Mr. Washington his highest commendation and points out how difficult his position is to sustain and carry forward in the midst of southerners who can hardly be counted on to support anything favorable to the negro.

Mr. Garrison speaks in the highest terms of Mr. Washington's sagacity and the wisdom he displays at the head of his great work for his people. The trouble is Mr. Washington is head and shoulders above his own people and most of them are too small to realize it. We have little sympathy with the canting proclamations we hear so much of here in the north, and especially in Boston, about the equality of the peoples of the universe, especially when we know how few people really believe it. No country worships rank more than the average American and he claims this equality of rank because in some mysterious way he thinks being an American has endowed him with a sort of kingship, no matter what his breed, or color,-be it white, black, yellow, or "mixed."

The test of ability, culture, and the power to achieve, makes it impossible that all men shall be equally free and equal. If it were not so, there would be chaos. There must always be a governing and subservient element and you can't mix them up unless you adopt anarchy. It seems to us that the negro does his best doorways. here and there, are native John H. > The annual meeting of the stockholders of the First National Bank of Arlington, Mass., was held on Tuesday afternoon, the 14th inst. Four hundred and twenty-six shares out of the five hundred were represented at the meeting, showing that in this instance directorsairect. The board of directors serving last year was unanimously elected, and after qualifying, organized by choice of Bailey, Jr., for vice-president: Heary Hornblower, clerk of board. This continues the old board of officers for the coming year. Great interest in the bank was manifested, and perfect satisfaction with its good showing made in the reports of business and present condition of the bank. It certainly is an institution of fie largest convenience to this entire section and one in which Arlington citizens may well feel pride.

In the Philippines.

Mrs. Augusta Beaumont, who resided at Arlington Heights for a humber of years, is visiting her son, Mr. Hartford Beaumont, who is employed in official work at Manila, in the Philippines. The following is a letter from her pen:-

"Manila is dull and sombre-looking. The older part or walled city is the same to-day in many respects as in the old Spanish regime. There are six gates, Isabella, Postigo, Palacio, Parian, St. Lugia and San Domingo. The last named was cracked by an earthquake several years ago and has been removed. The govern- to law. ment has also taken away some of the wall to admit the electric road.

The outside city, or up-to-date Manila, presents a different picture. It, too, has John S. Crosby, been electrified not only by cars (a fine William H. Allen William E. Wood system extending in many directions), but in every way-beautiful parks and government buildings, shaded by the graceful bamboo; even so Manilla is wholly unlike a city in the states. There is not a business street without Chinese dealers -the half-naked coolies running in all directions with loads or driving carts, while H. A. Phinney the natives dreamily propel themselves S. Fred Hicks along with enviable tranquility. In the picking vermin from each other's heads, serving a purchaser between times with cigars, betel nuts and food when occasion Comrade R. H. White, of Arling- offers. There is something typical and picturesque in their simple costume. It consists of a flowing skirt of gay colors, bright red or green and white being the common choice, and over this is worn a chemisette with wide, short sleeves, called a camisa, just covers the breast, and starched neck cloth folded triangulady hangs in a point down the back of the Hanging loosely, this article of dress keeps the wearer forever on the alert to keep it in place.

The native women move along street's with everything except brains, from a flatiron to a basket of delicious squirming chow. With the ever-present cigarette, presses nothing, and nothing is evidently in their minds, not even the children, for those children that are not astride the hip The death of Gen. Burton Halmes in New Travelogues.

With five entirely new Travelogues. Burton Homes returns to Boston on his fifteenth annual tour. It has always been Mr. Holmes' ambition not only to furnish to his patrons an excellent substitute forgactual travel, but also to administer to them an insiduous form of education in what might be called a sugar-coated tabloid. By means of his finely colored lantern slides and realistic motion pictures, the majority of both of which are from negatives of his making, he has brought the beauty and picturesqueness, the quaintness and unusualness of fall-away climes to the stay-athome, but this year he has taken as the subjects for his series, five of the great lines of good citizenship, for the benefit of those in his audiences who take an interest in clean municipal governments.

Berlin, said to be the best governed of European lities, forms the first subject in Mr. Holmes' coming series Vienna. one of the most charming cities to live in, - combining as it does the orderliness of Berlin and the fashion of Paris, - is the second in his list; an absolutely new lecture, "Biris, the Magnificent," is his third; and new lecture very much upto-date on London, is his fourth, while Fez, the Moorish metropolis, furnishes in his fifth travelogue a marked contrast to the up-to-date cities so near to it in miles but so far mmote in years.

"The Man of the Hour," by George Broadhurst, the most widely discussed play of modern times, comes to the Tremont Theatre next. Monday night. It has been witnessed by nearly a million people during its phenomenal run of almost two years in New York. Brady and Grismer bring the New York cast. The Man of the Hour" deals with the theme of political graft. It is a play throbbing with strong emotions and with red blood in its veins. It is essentially human. Even its political grafters are the real thing, big strong men of mentality and force. Around its parent stalk of sordid and mercenary intrigue are entwined

the tendrils of sweet and appealing affection—the lover of suitor and sweetheart, or mother and son. Viewed from any angle, "The Man of the Hour" is big, virile and fascinating. Its theme is one that concerns the civic and social safety of the nation. It is a man's play, a woman's play and an educational factor for the young. Seats are now on sale. One of the best all-around bills of the season

will be given at Keith's next week. "Peaches" is the sketch to be played by William Courtleigh and his company. It is from the pen of George V. Hobart and is one of the brightest things ever written. Laddie Cliff is an English youth who has recently scored a very big hit in New York with a repertoire of catchy songs. accompanied by some remarkable dancing. There never has been a more beautiful bird act shown in vaudeville than that of Marzella. The birds are the pick of the feathered world, and have been trained to do many inusual tricks. Fagan and Byron are seen in dancing specialties. The acrobatic act of Spissell Brothers and Mack, Charles Leonard Fletcher in a number of remarkable impersonations. the Basque Quartette, is one of the best vocal organizations in vaudeville, and the Goltz Trio are all in the bill. Hafford and Mantell, vocalists and conversationalists; Edmonds and Lee, two clever 'real coons;" Kitty Johnson, a pretty soubrette; the Juggling Barretts, club manipulators, and the Kinetograph will complete the program.

Mary I. Descombe, a special dramatic correspondent, says of "The Dairy Maids," at the Park Theatre : 5

"They can sing, they can speechify, they can group and dissemble, they can pose and, my, how they can dance! Those maidens, Flossie Hope and Bessie De Voie, are elfs that any fairyland would seek to win away from our nortal sphere. The prima donna of the performance, Mabel Rollins, may not be a Patti, but she enthuses her hearers with equal success and sets all heads anodding and feet apattering in unison with the rhythm of her solos. The blended voices of the male and fe-male chorus are as honied and moving. I won't attempt to analyze the why and wherefore of 'The Dairy Maids,' for its plot defies that. For the life of me I cannot tell you what it is all about. Why need I, since it is Course Tickess, reserved seats \$5, \$4, \$3 so pleasing and nobody cares to know? 'The Dairy Maids' is the first musical attraction, in a long long time, that the budding youth of old Harvard have not monopolized as appealing wholly to them as a class-for the reason that it is a performance that is addressed to every age and station of both sexes, and this is strikingly apparent in the complexion of the remarkable audiences now thronging the Park
feminines aplenty from grand dames to 'kiddies,' as well as those irrepressible young Harvards in the front rows.

TELEPHONE TALKS

Believing that exact knowledge promotes co-operation, the New England Telephone and Telegraph Company is publishing a series of brief expositions of some phases of telephony, for the benefit of itself, and, as it hopes,

for the benefit of all telephone users.

"TROUBLES," GREAT AND SMALL.

Telephone 'trouble' is sometimes diserally it is anavoidable, though a telephone system is no more absolutely perand faults are bound to crop out pince in a while. What makes telephone "trouble" a peculiarly difficult thing for the company to deal with, though, is that in very many cases there is no way of knowing that it exists until it is reported by the telephone user who runs against it.

The mechanical equipment and butside plant of the telephone system is extremely intricate and sensitive. The switchboard and its accompanying apparatus in the central office contain hundreds, and, in large exchanges, thousands of miles of wire; there are thousands, and, in the lions of soldered connections ; each circuit wrong. has anywhere from a dozen to 500 or 600 ravifications; and some of the auxiliary mechanisms are extremely delicate in ad- plicated plant of vast extent. The wonjustment. Most troubles arise somewhere in this maze of equipment-which is fortunate in one way, because a great to be met, the telephone company has so majority of them are thus detected and organized its work of maintenance and ing the subscriber, but without his even large telephone centres, where the plant knowing that they ever occurred But is most complicated, the individual subsome of them, as has been said, cannot scriber's service is not interrupted, even very well be discovered by anyone but momentarily, oftener than once in four the telephone user, since they may ap years on the average. pear to the operator simply as a stance, may not appear to her at alk

ly cuts off service for the time being. Yet with the restrictions many towns and cities place on trimming trees this difficully is univoidable.

Though cables are naturally less susconcerting and always annoying. Gen- ceptible to interference than open wire, still they cannot be absolutely protected whether they are overhead or underfect than any other human undertaking, ground. If the lead sheath of a cable is pierced by a hole no bigger than a pin would make, cand moisture gets in the whole bunch of wires enclosed, which may number from a dozen to 1200, will be put out of business sooner or later. The curiosity of squirrels and rats, the carelessness of laborers working on other underground construction-indeed, a score of unpreventable causes-may instantly ruin a telephone cable containing a large number of circuits. Besides, here and there cables must be brought to points, and the junctions in cable boxes on pole lines or in conduit manholes afbigger type of modern equipment, mil- ford other opportunities for things going

This gives an idea of a few-a very few-of the chances for trouble in a comder is really, that interruptions are as few as they are. With all the difficulties remedied not only without inconvenienc- repair that the records show that even in

Whenever there is "trouble" of any subscriber's failure to answer or, if sort the New England company, for its they affect the signaling devices, for in- town sake as well as for the sake of its subscribers, is anxious to get right after The sturdy looking pole lines and solid- it. The longer "trouble" exists, the more ly built underground system would not difficult and expensive it is to repair and seem, perhaps, to offer many changes for the greater the liss of business to the As a matter of fact, though, company. So it is a distinct favor to the they necessarily have many vulnerable New England company to have "trouble" points. Every time the limb of a tree, or reported promptly, and for making such any stray object that may have been reports the manager of any exchange caught in the foliage, touches a telephone may be called without charge from any wire it interferes with transmission; and subscriber's "station" or from any pub-

21st, Mr. MacFarland's Sunday school class will give two plays at Village Hall, viz., "Lucia's Lover," and "A Box of Monkeys." The proceeds are for the church. It is hoped they will draw a full house.

Mr. Fenner, who lived here with his wife and two children, in the house now occupied by Mr. Liddell, died at his home in Malden, Monday. He recovered from a severe surgical operation, but was not very strong and was taken ill last week. He had many friends here who loved and respected him.

to state that the morning session at Follen church will be a service especially for the children. The sermon will be brief and preached to the boys and girls. The choir will consist of the children. The subject of the service will be "Cheerfulness." All the children of the community are cordially invited and parents are kindly requested to make a special effort to plan for the attendance of their boys and girls at this service.

Rev. H. A. MacDonald preached on The Principles of Service," his text being, "For their sakes I sanctify myself." We call those men and women selfish who are living for their lower ideals and who care not for the life of helpfulness. We speak of those as living for self who seek to have no care about the higher welfare of others. Service is the child of love. We all know the inadequacy of help by means of money, which often lowers the self-respect of the recipients of aid. We must be honest in our love-giving. We must hear the call for help in itself, without seeing the color of the skin or the size of the bank account. True love is not satisfied unless it can alleviate the suffering or meet the need that is its real object. We must be sincere in our love giving. Each gift or word of love should be a true expression of the man who gives. Our highest privilege in this life Is to live in accordance with the motto of Jesus, "For their sakes I sanctify my-Jesus consecrated his entire life to doing good to those around him. True service is consecration of life to the needs of others, living always in the thought of the help we can give and the cheer we can bring to others.

meeting Sunday evening and the young choir added to the pleasure. Miss Wright's paper was very excellent. Her subject was "Social Relations." She said "Thoughtfulness is one of the rules of life, which can be divided into five important parts. 1st, Gratitude; 2nd, Politeness: 3d, Good Judgement; 4th, Conscience; 5th, The thoughtful person is happy. It is hard to think, but in the end there is great gain, for the thoughtless, selfish, giddy person is not the happier. We ought to be gracious, whether we are appreciated or not. We are here not to get, but to give. We are made for society, but we must be true individuals in order to be capable of it. True society begins at home, as the true foundation of the social fabric is home and happy marriage. Then comes the nelghborhood;

Miss Pearl E. Wright led the Guild

not those who live in the next house, but those who love us and whom we love. We need all kinds of society and we need church life and a church home. After: giving many appropriate illustrations of her subject, she said we should be public spirited, help the unfortunate, contribute to the improvement of the town. "Think Many from here enjoyed the dance at truly, speak truly, live truly and thy life shall be a great and noble creed."

have held most successful union meetings during the past two weeks. From the beginning the audiences have been large and the interest fervent and deep. Noth--The Study Clab held an especially ling like the religious awakening now gowith guests, left the Heights in a part of the town. The ministers have special car, at 1.3% for the Boston Art done the preaching in turn, with an after Museum, where they were met by Mes meeting also conducted by one of the Margaret Patterson and conveyed to one ministers. The music has been in charge of J. W. King and his wife. The meeting have been marked by seriousness from the beginning and the heartsearch register and confirm her title in the following ing has been sincere. Many have been eagerly seeking for a richer and profounder experience and not a few have placed themselves for the first time as on the Lord's side. Sunday evening many responded to a test for decision. During the present week the meetings have been held in the churches as hitherto, with growing power and encouragement. The closing service will be this coming Sunday evening. -Tuesday evening a large representa-

tion of the church and parish of Park Avenue church sat down to a bountiful supper arranged for by Mrs. Emma Spencer Church and her helpers. It was the occasion of the annual meeting of the church and congregation. The meeting for business was called together by the clerk, E. W. Nicoll, and Mr. Joseph C. Holmes was chosen moderator. Most encouraging reports were presented from the departments of church work, showing a successful year, and giving promise of yet greater things for the future. The officers chosen, as presented by the nominating committee, were as follows:

Clerk, E. W. Nicoll; treasurer, Joseph C, Holmes; collector, Paul P. Brigham; Sunday school Supt., Minot A. Bridgham; deacon, Joseph Morrison; standing committee from church, Joseph C. Holmes, C. T. Parsons, L. F. Bridgham, P. P. Brigham, Henry S. Sellers; standing committee from congregation Wm. H, McLellan, Burt S. Currier, L. D. Bradley, Mr. Crockett; on the church com mittee with the ex-officio members, Arthur F. Breed. Miss Sarah Henderson; music committee, Burt S. Currier, E. W. Nicoll; collector to the Lexington Home for Aged People, The tor, L. D. Bradley.

The church provided for the appointment of a large committee to raise money to reduce the debt on the church building. Good feeling prevailed and the outlook was never brighter for a most successful, if not notable, year in the history of the church.

Lecture on Whittier

Mr. Leon H. Vincent gave the second lecture of the season in the Pratt Fund school, on Friday evening, the 10th. The lecturer was presented in a few words by Principal Holt and was greeted by one of the largest audiences which has assembled in this hall for some time, showing that Mr. Vincent made such a strong inpression at his first lecture in this course and hear him. His subject was, "Whitti er's Legendary and Historical Verse. Mr. Vincent opened by giving a brief bi it to have been a sturdy race of men, famed for their physique. They were o French Huguenot stock, with strong re ligious convictions and upright in their dealings with men. Whittier's early struggles with adverse circumstances were touched on, also the simplicity of his

and best known poem of Whintier was received .- "Snow Bound."

The lecture was a fine one for young people to hear, for it showed what the power of self-denial, concentration and the purpose to be true to the best in one's self may accomplish. Whittief calculated that when the expenses of his education were met he should have just twenty-five cents left. And that was the exact sum which he did have, showing how close his calculation had been. The money was carned for his expenses at making shoes at eight cents a pair. His great success did not come until he was sixty years old, when he published snow Bound," and the earnings brought a rich harvest to the poet and publisher. In alluding to this, he expressed himself in a facetious way and to the effect that he and his publishers were swindling the public by such unheard of profits and were greater frauds than Barnum. This outline of what Mr. Vincent had to say will show how interesting and comprehensive the lecture was.

HUMOR OF THE HOUR WASHINGTON LETTER

Dil He See the Point?

There is a bright young woman of old in washington who at polic sunction this winter found elf much bored by the attention of tigesh young man, the son of a sen-

for from a southwestern state. Soon after his introduction to the oung woman the fresh young man oceeded to regale her with a story some aliventure in which he had red as bero. His listener, a remarkly well bred girl, was as much sur-ised as he could have wished, though of in the same way.

"Did you really do that?" she asked. not knowing what else to say.

"I done it," was the proud response of the fresh young man, and he began forthwith another lengthy narrative more startling even than the first. The young woman again politely expressed her surprise

"Yes," said the hero, "that's what I done. A third story followed, with another

whereupon the girl re-I done 儀. marked: "Do you know, Mr. Blank, you rein the plag?"

"Why?" "Don't you remember that Macbeth said to the ghost. Thou canst not say I did it." "Lippincott's.

Good Intentions.

"So," sall the banker severely "you are hoarding these new gold pieces!" "No," said the common citizen, "I am not exactly hoarding them. But I feel that their artistic influence is so bad that it is my duty to keep as hands of the public."-Washington

Your father is in politics, said the stranger, is he not?" "Yeh," teplied the boy, "but mom

"How de you mean?" "Why, his stummick has gone back on him, an he can't drink like he useter."-Catholic Standard and Times

thinks he gettin' cured of it."

Two of a Kind.

Husband-I told your father that I couldn't possibly support you!

Wife-And what did he say Husband-He told me he had had the same experience!

Drawbacks.

"Really," said Miss Planeley, "I consider it a very good portrait of me Don't you think it would be wise to have it engarged?"

"Why-yes," replied Miss Brakes, "but ther you'd have to make the mouth and ears larger, too, wouldn't you?"-Philadelphia Press.

At the Boarding House.

Room to Work. Stubb-Yas, that gentleman says the more open saced a man is the better he

likes him. Penn-Indeed! Is he a minister?

Stubb-No; he is a dentist.-Chicago News.

The Human Nature of It. "Why don't you quit smoking, old chap? You know it hurts you?

"Certainly. But every time I make up my mind to do it somebody comes around and tells me I ought to." Puck.

All He Had. Wife-What do you mean by bringing those maddy feet in here? Husband-Scuse me, m'dear (hic), Did'n' have any othersh t' bring. Had

hard time gettin' theesh in.-Behemian.

Fitting Pets. "I wonder why actresses have such a fancy for Skye terriers?" "Don't you think yourself they are the best kind to go with stars "-Balti-

Revision. When your head hits hard And your thoughts feel queer And your heels rise up Like form on beer, When your voice is weak
And your language strong
And the stars you see
Are six feet long,

more American.

It is not improbable that some careless person has thrown a banana skin on the pavement. Andrew Armstrong in Judge.

Special Correspondence. A large and interesting collection of the work of American illustrators is on exhibition at the library of congress. Nearly 500 illustrations are ininded in this collection, and many persons who have won distinction in this field are represented. Each illustrator's work has been separately grouped, and these groups have been irranged in alphabetical order. Thus the exhibition begins with the work of E. A. Abbey and closes with that of

Rufus Zogbaum.

Mechanical Methods. In the mechanical methods of reproduction great strides have been taken within the last few years. The half tone process accomplished much, but the three color process has done even more in widening the scope of illustration. There is still, of course, bad color work. Some included in this exhibition is undoubtedly far from satisfactory, but there is also much which is surprisingly good. Most of the work which is now on view at the library of congress is in color, and examples of mind me so strongly of Banquo's ghost the best which has been produced are

The exhibition is made up exclusive-

ly of material derived through the copyright office, and it is set forth more for the purpose of study than with the object of display. Certain well known illustrators are not included in its catalogue through the failure of the publishers to comply with the copyright law and deposit 12-12. Twelve blows twice—Police Call. prints copyrighted in the library, but on the whole the exhibit is found remany of them as possible out of the markably representative and compre-

For Purpose of Study.

A Forest Destroyer.

Public Printer Charles A. Stillings. who comes from Boston, is found to be the greatest devastator of the forests in all the public service. The big building, covering a city block, where the government printing is done. which houses more workers by day and alike by night than dwell in many a populous New England town, consumes forty tons of good white paper every twenty four hours of the year.

The leather bound volumes which the government distributes to fts officials and others require for every twelve, months 50,000 square feet of

cowhide buffing and 60,000 sheepskins. Duck Hawks Haunt Capital.

Every winter for years a pair of duck hawks have used the tower of the postoffice department building on-Pennsylvania avenue as a place of refuge? The birds are in their winter quarters again this year, and from their safe retreat high above the street they make daily trips to the Potomac, where they pick up many a luckless coot and grebe.

The duck hawk appears in very slightly varied forms in most parts of the world. The extent of its range has given it the name of the wandering falcon. It is impossible, of course, to tell whether the pair of falcons in the tower of the postoffice building this winter are the same that have lodged there during the cold, weather in past seasons.

Saved by Bira Lovers.

Three or four years ago some of the postoffice authorities sought perhission to shoot the hawks, for they were in the habit of carrying their quarry into the tower there, to devour it at their leisure. Pipes became obstructed with the remnants-feathers, bones and feet of the hawks' victims, and so the death of the marauders was de-

Bird lovers argued that if killing game were to be made a capital offense a good many men would suffer. There y : a protest against the killing of the hawks, and they were spared.

Guggenheim's Modest Home.

Simon Guggenheim of Colorado is the richest man in the United States senate. Some of the heretofore far famed millionaires look like poor men beside this mining and smelter bing He has leased at an annual rental of \$22,000 the famous old Windom house. at 1601 Massachusetts avenue, about a block from the residence of Senator Lodge, and he was able to find this modest place to live only after a long search, for every other house in Washington wasn't provided with enough

bathrooms to suit the westerner.

handsome home of the senator, which 16 Lowell St., near Arlington line 21 Cor. Bloomfield and Eustis Sts. handsome home of the senator, which is now owned by Mr. Munn. About twenty years ago it was built by William Windom, sometime United States senator from Minnesota and secretary of the treasury under Harrison. Windom was regarded as a poor in his state and in Washington, and the senatorial salary then was only \$5,000 a year. So when he put up this magnificent home pictures of it were the property of the senatorial salary then was only the senatorial salary then was regarded as a poor and the senatorial salary then was only the senatorial salary the senatorial salary then was only the senatorial salary then was only the senatorial salary the se magnificent home pictures of it were 43 " made and circulated in Minnesota, and 51 Hancock St. near Hancock Ave.

the 391 members of the house of representatives, but an abnormal number have a great desire to qualify as farm.

341 Electric Car Station, No. Lexington ers. Uncle Joe Cannon has proof of this in the fact that more members applied this year for places on the agricultural committee than applied for any other house committee. Heretofore it has not been regarded as an especially desirable committee-in fact, it has been looked upon as a minor committee, assignment to which could not be viewed as anything of a distinction.

In very many states there has been an awakening among the farmers to the extensive and exhaustive work the department of agriculture is doing and also to the constantly increasing appropriations congress is voting for that department. CARL SCHOFIELD.

Their Sensitive Muscles Make Them

Great Telltales. "It's a queer thing." remarked the professor, "how people can control"

their wes and not their mouths." The inventor with whom he happened to be talking made the comment that the professor probably meant tongues when speaking of mouths.

"No. I didn't mean tongues. I meant mouths," the professor rejoined, "I mean, if you want to be scientifically accurate, the action of the lip muscles. There's hearly always, in a moment of excitement, of exaltation, depression or emergency, a telltale movement on their part which can't be guarded against. Why can't it be guarded against? Because it is so largely unconscious. Most of us from our youth up have been trained to use our eyes, and to use them in such a way as to conceal our emotions. It's different with the mouth. Perhaps we haven't advanced far enough to do two such important things at the same time. Anyway the fact remains that we don't do it

"If, for example, I have reason to believe that a man is not telling me the truth I don't give my attention to his eyes. He may look at me as fearlessly as he wants. What I watch for is something significant in the region of his face below the nose. If there is no change in the expression of his lips I am disposed after all to believe him. But if there is the least trembling or twitching the least exhibition, let us call it, of nervousnesswell, then, I have my doubts."

"I suppose," observed the inventor, "that while that fact does not explain the wearing of the mustache it shows that the mustache has uses."

"It does," returned the professor, "but you must remember that the mustache, as a rule, doesn't obscure the lower lin. And the lower lip, if you'll take the trouble to notice, is if anything more revelatory than the upper one. It is usually that lip which gives the expression to the mouth | The upper lip follows suit, as it were."

"Well, well," said the inventor, fingering his mustache.- New York Press.

A KING'S UNDRESSING.

The Ceremony Was a Wonderful One In Louis XVI.'s Time. In "Memoirs of the Comtesse de

Boige" (1781-1814), edited from the original manuscript by Charles Nicoullaud, is found the following realistic. description of the "coucher" of Louis XVI.:

"The king's coat, waistcoat and shirt were taken off. He stood there naked to the waist, scratching and rubbing himself as if the had been alone, in the presence of the whole court and often many strangers of distinction. The first valet handed the nightshirt to the most highly qualified person, to one of the princes of the blood if any were present. This was a right and not a favor. When the person was one with whom he was on familiar terms the king would often play tricks while putting it on stepping on one side to make the holder run after him, accompanying these, charming jokes with toud guffaws, which greatly vexed those who were sincerely attached to him, When his shirt was on he put on his dressing gown, while three valets unfastened his waist belt and knee breeches, which fell to his ankles, and in that garb, scarcely able to walk with these ridiculous fetters, he would shuffle round the circle of those in waiting. When the king had had enough of it, he shuffled backward to an armchair which was pushed into the middle of the room and dropped into it. lifting up his legs. Two pages on their knees immediately seized his legs, pulled off the king's shoes and let them drop with a crash, which was a point of etiquette. As soon as he heard the noise the usher opened the door, saying, Gentlemen will please pass out.'. Those present went away; and the ceremony was finished. However, up, we shall be pleased to add their names in our next issue. the person who was holding the candlestick was allowed to stay if he had anything special to say to the king, and hence the value that was attached

> to this strange flavor." Unlucky Suggestion. An old view had a groom who had been detected stealing his master's oats. The vicar had not decided what course to take, and meantime the groom had gone to the curate to ask him to plend for him, and the sympathetic young fellow hastened to the rectory to appeal to the vicar. The old vicar heard his curate out, but looked obdurate, so as a last resource the curate quoted Scripture as a plea for leniency and said we were taught when a man took our coat to let him

"That's true," said the vicar dryly, "and as the fellow has taken my oats I am going to give him the sack."-London Answers.

take the cloak as well.

Bulls In the Graveyard. The kirkyard was full, and a brand new cemetery was laid out. Sandy Mc-Tavish, looking over it with Andrew Bruce, protested that it was "too continental" in style. "I'd rather dee than

be buried in sic a spot," he declared. Andrew was less difficult to please. "Weel, it's the verra reverse wi' me." he said, "for I'll be buried naewhere else if I'm spared."-Glasgow Times.

Elementary Arithmetic Judge-What age are you? Pat-Eight and fourscore my lord. Judge-And why not fourscore and eight? Pat-Because, my lord, I was eight before I was fourscore.-London An-

THE TOSS OF A COIN

Mathematics of the Turning of Heads or Tails.

CHANCE AND THEORY CLASH.

If Heads Turn Ten Times In Sequence, Theory Says the Odds Are Against Another Head, Yet Chance Says the Odds on the Next Toss Are Even.

A famous mathematician, Professor Karl Pearson, once spent the greater part of his vacation deliberately tossing a shifting and making careful notes of how it fell. He spun the shilling 25,000 times, and a pupil of his, working separately, spun a penny 8,200 times and also tested the drawing of 9,000 tickets from a bag.

It may seem strange that a learned professor should put himself to such an amount of trouble to demonstrate what every schoolboy who had ever ossed a coin already knew. Yet, as a matter of fact, few really do grasp the laws which govern such an apparently straightforward matter as the tossing of a coin. In the words of the grithmetician, the theory of "runs"or tails turning up repeatedly-is predisely as follows: - A

The chance of a head is one-half; of two heads following, is one-half multipifed by on half that is, one-quarter; of three heads in succession one-half multiplied by one-half multiplied by one-half-that is, one-eighth. Now. what do you suppose is the chance of run of eleven heads? It is safe to say that not many persons, however accustomed to tossing coins, have reasoned this out. The fact is that one "run" of eleven heads is on the average only to be expected in 2,048 sets of coin tossing.

Although the man in the street may not have reckoned this, he is always quite positive that if, say, a coin has fallen ten times head upward he is safe to start backing tails. He puts his money on tails turning up because, he says, it stands to sense that the run of heads can't continue. But does it? At the eleventh toss the head of the coin is just as big as it ever was. What mysterious influence can a past event, the tossing of ten heads. have on a future one which has no link with them namely, the tossing of the coin the eleventh time? Surely each toss is an event by itself, as Sir Hiram Maxim said of a game at roulette at Monte Carlo:

"It is a pure, unadulterated question of chance, and it is not influenced in the least by anything which has ever taken place before or that ever will take place in the future"

the cranks who had published schemes for "breaking the bank" and whose plans depended entirely on the theory that if one game ended in a win for 'red" the chances against it Thirty-nine Distinct Varieties of Work ending "red" a second time were less althird time less still, and so on.

enough argument provided that you regard some dozens of games of r lette or tosses of a coin all as one co tinuous event. It is quite safe, for. stance, to offer beforehand big odds against a coin turning up heads ten times running. But in practice the public house loafer does not do this. turning up heads eleven times are as to 1. But suppose you only start betting at the tenth toss. What are the being a head?

Irishism, the odds are even-that is to say, if you split up the eleven tosses into eleven separate events to be bet on separately your bets should be "even money" all the time, however often heads turn up running. But if you view the eleven tosses as one combined event and you offer a preliminary bet against the whole eleven results being heads you will have to give gigantic odds.

All this goes to prove the absolute uncertainty of gambling. The greatest mathematicians of the day cannot be certain how a coin will fall, so that the man of merely average abilities who stakes anything important on the toss of a coin is allowing that part of his fortune to pass entirely outside his control.-Pearson's Weekly

South Africa's Locusts.

Millions and millions of locusts settle and millions and millions continue flying to settle farther on. They have been settling in myriads for a hundred miles and more, and yet enough are left flying to hide the sun. On the ground nothing can be seen but locusts. So thickly do they pack that not a square inch of earth or grass is visible. As you walk through them a narrow wake is left for a few seconds in your track where they have flown out of your way, and as they rise in thousands before your feet the noise of their wings is like an electric power. station.-Grand Magazine.

Putting It Mildly.

The flooding of a Yorkshire mine had tragic result, and a miner was deputed to break the news to a poor woman whose husband had been drown-

"Does Widow Jones live here?" "No," was the indignant lady's reply. You're a liar!" he said.-London

Never tell your resolution beforehavd.-Selden.

CATCHING A. L. A.L.OSS.

The Bird Enjoys the Sport and Is Landed Uninjured.

With the birds settling by the dozen It is easy enough to capture specimens for examination without causing injury or pain. Any sharply barbed hook is altogether superfluous. The albatrosses absolutely enjoy the excitement, and the sport obtained is not without a novel interest.

A small metal frame should be made in the shape of a hollow triangle attached to 100 yards of stout line and kept affoat by a good sized piece of cork. The sides of the metal frame are then covered with bits of fat pork, the hard skin of which is securely bound thereto. The bait is thrown astern, and the line is slowly paid out.

Presently a great albatross swoops through the air, impelled by curiosity to investigate the nature of the floating pork. It settles before the dainty morsel of food; numbers of birds fol low suit, each one made bold by competition, and then the sport begins.

At this moment additional line must be given in order to compensate for the progressing of the ship, thus enabling a bird to seize the desired food. With a sudden rush the supreme effort is made. Once or twice the attempt proves ineffectual; but, rendered bold by greediness, a final grab finds the curved bill securely wedged inside that is, heads turning up repeatedly the apex of the triangle as the fierce tugs on the line quickly indicate.

Steadily the haul is made, hand over hand, until a helpless albatross is bodi- verb ly lifted on to the poop in an absolutely uninjured condition. A slackened line enables the bird to escape, and if scattered wits permitted such an effort sudden Night would obtain release.

The other birds invariably commence to attack a wounded commade, a steady pull being required, even if the line does cut your hands, to save it from It friends. Onde salely on deck the Of little breadth. 10. Rubbish. 11. A mandibles are tied together, for othe young child. 12. Safe. 13. A Trojan erwise the bird throws up an oily here. fluid; a disagreeable habit possessed by all the tribe

Subject by this precaution it may wander gravely around to survey the new horizon of life. The large eyes gaze with a truly pathetic confidence expressive of anything but fear.

It is a strange spectacle to witness the inquisitive bird solemnly waddle to and fro among the equally inquisitive human beings around. True, it objects slightly to the process of measurement, pecking sharply by way of protest, but a gentle box on the ear. soon induces submission as the dimensions are rapidly noted, the albatroes meanwhile reposing affectionately in the arms of the second officer.

The specimen happens to be a small one, but the wing expansion from tip to tip is less than ten feet, the extreme length of body is three feet six inches and the formidable bill measures upward of four inches.-Cornhill Maga-

MAKING A COAT.

by as Many Men.

According to the United States bu-This of course would be a sound read of labor, the old saw "It takes nine tailors to make a man" is filled with misinformation, for in reality, the bureau finds, it takes thirty-nine men of different trades just to make a coat under the present system of shop manufacture, for the day when one tailor measured the customer, cut out the cloth and, with his apprentices, What he does is to bet on each serial shaped it into a finished and pressed rate toss by itself, thus defeating his garment has practically bassed. Toown nims. The odds against a coin day all one tailor may do through his entire life is to mark the place where has been shown, something like 2.000 buttons are to be sewed on. Another man never marks places for buttons. His specialty is to mark buttonholes. odds against the eleventh toss again A third man spends the long day in sewing on buttons, a fourth in mak-The odds, so far from being 2,000 to ing buttonholes. Men who sew sleeves 1. are actually 1 to 1! To use an do not make armholes. The armhole men give place to shoulder shapers, and these last do not touch collars, which are a distinct specialty. Even the men who manipulate the tailor's goose are divided into pressers of seams, edges, linings, sleeves and coatpressers. The basters stick to one distinct specialty of basting, and a separate functionary, the basting puller, undoes their work. Even the coat strap is a separate province. So that when the coat is finished it represents thirty-nine distinct varieties of work by as many men. And when a man finally puts on the coat he is wearing the product of 312 fingers and seventyeight thumbs, not counting the digits of those who sheared the sheep, wove the cloth, dyed it, finished it, shipped It and cut it nor the ink stained clerical hands which kept a book record of all the processes. Probably from sheep to wearer the coat was handled by at least 3,000 fingers.-New York Tribune.

Elephant Police.

The sight of six pairs of elephants simultaneously at work capturing a half dozen struggling, trumpeting mates is an imposing one. Like a pair of animal policemen arresting a prisoner, the great beasts sidle alongside a victim, take him between them and jostle and squeeze and worry him, tail first, toward a tree. Every inch is contested by the herculean fighters until nearing a stout tree or stump the little brown elephant catchers slide from their mounts to the ground, crawl under the ponderous bellies and shuffling, kicking feet, slip cable slings about a hind foot and take a turn ground a tree.-Strand Magazine.

NEW SHORT STORIES

The Western Man Knew.

W. Murray Crane, sometime governor of Massachusetts and at present representing that ancient commonwealth in the senate, has been grieved to discover that the natives of the national capital are not so familiar with the life and accomplishments of Daniel Webster as he would like to have them. When Mr. Crane set up his office gods the decorations of his desk included a fine untouched photograph of the great antebellum statesman. It is a rare picture, a copy of the last photograph for which the illustrious patriot posed, and the Massachusetts man would not part with it for money. Every visitor remarked the picture and asked questions, and Mr. Crane rejoiced that in bringing his pet relic to Washington he had added much to the sum of knowledge.

One morning he was very busy, and one of his visitors, a senator from a bustling western city, was compelled

"DO YOU LIKE THAT PICTURE?"

to wait. A page came in, and while he also stood waiting he looked long and earnestly at the great man, of whom Oliver Wendell Holmes said, "No man was ever as wise as Daniel Webster

Turning around, Mr. Crane noted the interested gaze of the urchin, and, be ing a genial man, used to dealing with boys, he asked, "Do you like that bic ture, and what do you think about it?

"I was thinking," answered the boy. "that I would like to know who it is. I can't tell whether he's a very smart man or a very bad man.

Before Mr. Crane could reply his brother senator broke into a loud guffaw. "Sonny," he explained, "that is as you have been taught to look at things. Some folks would call that a very bad man, especially temperance people who had seen him in Rip, and others think he was the best of his noble profession in this or any other generation. I say, Crane, looking at it well, it's the best picture of Joe Jefferson I ever saw. Where did you get it?"-Washington Herald.

When Dalzell Nodded. Congressman John Dalzell of Pennsylvania isn't bigger than the proverbial pint pot, but he has his bushel share of picturesqueness, good nature, temper on occasion and always his barrel share of stand pattism. The Democrats say that he is a Republican past regeneration, even though an edict from above should go out against the creed of Republicanism. Dalzell believes in the Republican party, the tariff, the state of Pennsylvania and the city of Pittsburg—the city of Pitts

burg particularly. It always was said of Dalzell that he never slept. He is pervous energy in the essence and more watchful of Republican interests generally on the floor than is the Republican leader.

One drowsy June day a year ago last summer when the house was heavy and business was simply droning its way through, Dalzell, yielding to environment, nodded and then napped. Anstantly a wily, wide awake Democrat put through something to which no one saw any objection. It touched Pittsburg. Dalzell aweke too late. He had

been asleep at the switch. Had his eyes never known night since that hour, he could not have lived down the memory of that one unconscious moment. Only last week as he was leaving the White House three voices in unison called to him so that all within a block could hear, "Any sleep this session, John?"

Dalzell was wakeful to the emergency, and his answer carried little comfort to the inquirers, for none of the three was a stand patter: "Not if the tariff is up."-Chicago

Some Scotch Sarcasm. The late Duke of Argyll and Sir

William Jenner, physician to the queen, were both in attendance at Balmoral, and one morning at breakfast the discussion turned to the virtues of porridge. The duke, who was slight of build and small of stature, overhearing some disparaging remarks on the national dish, said:

"Porridge? Why, excellent stuff! brought up on porridge myself."

Jenner, who was a big man and did not like the dish, looked sharply across the table and retorted:

result I think you think yourself."- hear everything. This thing fills the London Times. bill!"

CHOICE MISCELLANY

Castles In the Air. From time to time sharpers work upon the credulity of people bearing old Dutch family names by advertising that large estates are awaiting distribution to heirs scattered throughout the United States. In many instances organizations have been formed and money pooled to prosecute claims. Since 1878 the United States ministers and consuls at The Hague have several times published reports denouncing all such estates as purely

They are myths, will o' the wisps, fakes. The Bank of Holland, in which the unclaimed millions are alleged to be deposited, does not exist. If any such ever had a bona fide existence. they escheated to the state fifty years ago under the statute of limitations passed by the Dutch parliament in 1852. Every dollar spent in reference to these estates is so much money wasted.

They include the following, so called: The "Anneke Jans," the "Cronkheit," the "Van Cot," the "Van Dussen," the "Webber," the "Brandt" and the "Metzger."- New York Tribune.

Powdered Eggs.

Much interest is felt among German chemists over the reported degree of success which has attended efforts to preserve eggs by desiccation. United States Consul Norton of Chemnitz Germany, writes: The process was invented by a chemist of Victoria Australia. Eggs, freed from the shells are dried at the relatively low temper ature of 130 degrees F. The operation can be rapidly executed in container kept at this temperature, from which the air has been exhausted and from which likewise the aqueous vapor i withdrawn as fast as given off b evaporation from the eggs.

"There is no afteration in the chemical composition of the eggs. There simply a loss of the greater part o the water held mechanically in combi nation, as when fruit is dried by free exposure to the air and sun or by more rapid artificial methods. The egg material can be preserved for an indefinite period in ordinary packages.

"The eggs are reconstituted by the simple addition of water."-Chicago News.

London Pronunciation.

Professor Kuhnemann of the Uni versity of Berlin, was tremendously impressed on his recent visit to Bostor with the learning of Boston's women. "From the highest to the lowes

class," Professor Kuhnemann said a a dinner at the Lorraine, "I find the women of Boston marvelously learn ed. To find a scholar's daughter learn ed is not surprising, but when one finds learning in a Bodeagrier's daugh

ter one can't but be impressed." Kuhisemanh thoughtfully

"How different things are in London," he said: "There I once over heard a cook operecting the grammar of a housemaid.

"Don't say stax" you wulgar crit ter, corrected the cook; say tharsk." -Washington Flar:

The New French Machine Gun. Although the French army remains unshaken in the belief that its new machine gun, firing 650 balls a minute is the most formidable in the world certain important defects have been pointed out in all the gunnery damps where it has been tested. Owing to its practically unceasing tire gases gener ete, which throw it outsof gear, though in some cases 10,000 shots have been fired without revealing any fault. The arsenal at St. Etienne has been fur nished with designs for modifications which will remedy the defect, allowing for which officers believe that no regiment could advance 500 yards without

Color Bearers,—Margaret Carson, Mrs. Britton, Lexie Smith, Ella Warner.

Mrs. Knowles was presented with a handsomely bound copy of Longfellow's poems, and the others participating were given bouquets.

These formal exercises culminated in a series of interesting events, Commander mental music by Post 36 Orchestra and vocal selections by the members and others of Post 36 who were present; addresses by Jr. Vice-Com. John L. Parker, Mrs. Mary E. Knowles, Commander John Ewart of Post 36, Mrs. President Morse of Corps 97 and chief Franks of the local police, called on to speak for the Asso-

Woman's Alliance Meeting.

The Woman's Alliance met on Monday afternoon in the parlor of the Frst Parish (Unitarian) church. Arlingion, at three o'clock. Mrs. Tupper, the president, introduced the speaker of the afternoon, who was Rev. J. M. Wilson, of the Lexington Unitarian church. Mr. Wilson's literary tastes have led him to study along lines that are perhaps not so familiar to the setting of poles in our streets. Careless-ington has but the relations between the the average person, and that he is willing to give of his time and talent to the edification and enjoyment of others is indeed fortunate for those who have been privileged to hear him. On Monday afternoon Mr. Wilson read a paper on Ecclesiastes, the writer of a portion of the The third annual concert and ball of the parish supper and entertainment in book in the Bible of that name, who was the Lexington Firemen's Benefit Asso'n charge which took place in the supper besides an author, a physician in Jerusalem, living in the second century before Hayes' orchestra will furnish the music. Wednesday evening. Mrs. C. B. Davis Christ, and Omar Khayvam, a Persian poet and astronomer, born in the latter part of the eleventh century, but who lived in the twelfth century.

Mr. Wilson said that in reading the poetic thoughts of these two men, as expressed in their writings, be had become interested in comparing their natures, as well as poems, because of their many similar traits of character. In the opinion of the speaker, Omar's was the finer mind. He represented a certain type of man with whom we come in contact each Wednesday, February 5. "Democracy." Rabbi oyster patters, cranberry jelly, cake, ice day and was therefore interesting to study. Ecclesiastes also represented an-other type, but one to whom few are Mrs. Mabei Loomis Todd. other type, but one to whom few are drawn to, because of his hopelessness in all things. Both were epicurian skeptics and agnostics, the speaker said, who then and agnostics, the speaker said, who then went on to draw comparisons of the manner in which their thoughts were expressed, by commenting on groups of quotations which he recited with telling duotations duotation duotation duotation duotation duotation duotation duotation duotation duotation du tality, morality and wisdom were quoted, all of which gave a comprehensive idea of the speaker's subject, which was handled in a manner that gave unalloyed pleasure to those present.

At the conclusion of the paper Mrs. F. Y. Wellington and Mrs. Geo. Hill served refreshments from an attractively arrang-

Ice Hockey Games.

Friday afternoon, the 10th, Arlington High hockey team played the Melrose pastor's subject at the Baptist church. High on Bennett's Meadows, Melrose, and defeated them in a score of trail. High on Bennett's Meadows, Melrose, and defeated them in a score of 4 tol. It was the first game Melrose had played in the Interscholastic League. It was a like a small harricane in their whirl wind was gracefully introduced by Miss Hardy. Miss Browniee is the originator of

Portal and Perkins was plus

The Music Club Entertains.

The Music Club gave a "guest night," on Monday evening current, at the residence of Hon. Jas. A. Bailey, Jr., 114 Pleasant street, Arlington. Mrs. Bailey was the hostess of the evening and redeived in a spotted white tulle combined with satin and lace and wore diamonds and pearls. This beautiful full evening toilette was exceptionally becoming to the wenrer. The occasion was, besides being a musical treat, a society function as well, and was graced by handsome evening toilettes. The program was enbyable in every particular and its varied nature showed the versitility of the talent of the members of the club. The pianists taking part were Mrs. Bailey, Mrs. C. A. Dennett, Mi-s Katherine Yerrinton, Mrs. Myra Pond Hemenway, Mrs. Henry Bullard and Mrs. W. D. Elwell. Most of these ladies were heard in concerted numbers, which they brought out most effectively by thouse of two pianos. Miss erriaton was heard in a solo number which was rendered with much beauty of touch and finish, and Mrs. Hemenway's prominence in the program gave her an opportunity to display her brilliant interpretation of the piano. The vocalists were Mrs. J. F. Scully, Mrs. Herbert Telephone 174-2 Arlington W. Reed, sopranos, and Mrs. E. Nelson Blake and Mrs. Henry Hornblower, contraltos. These ladies are all popular ingers as well as favorites in society and they were cordially received and much enjoyed. The concerted numbers were es-Hesdames Blake, Scully and Reed. Miss God, Myrtle Walcott was an accomplished and sympathetic accompanyist, while Miss Illelen Taft added her share to the com-

Boston Elevated Railway Company TO OUR PATRONS:

We seek the kind co-operation of our patrons to improve our service.

We have nearly five thousand uniformed men employed in our car and station service. Many of them have been in this service for years, and we believe that the behavior of this force, as a whole, is quite suitable. Notwithstanding the good character and courte-ous demeanor of by far the greater portion of these uniformed men, there still remain some who offend by carelessness, inattention or discourtesy. We ask our passengers to report any instance of misconduct, giving witnesses, if possible, and sufficient data to identify the incident.

We request our passengers to comply with the regulations established for the safety or convenience of all concerned, which it is the duty of car service men to enforce with due courtesy. We ask both for these rules and these men a fair consideration.

IMPROVEMENTS IN SERVICE

Although we have a large staff of superintendents and inspectors constantly on the watch, some things may be overlooked; and therefore we request passengers to report irregularities of service and to make suggestions for its improvement.

We have received and availed of many such suggestions in the past, and we thank those of our patrons who have interested themselves for the trouble they have taken.

Please address communications to the Superintendent of Transportation, 101 Milk Street, Boston,
